

Electric Brand

Tough construction plus back-up service make this the longest-lasting electric brand around! Extra bracing of heavy 3/16" steel keeps the element in shape through hours of branding heat – produces a sharp, legible brand every time. Safe, strong barrel insulates against heat or electric shock. Heavy cast aluminum handle fights fatigue with comfortable pistol grip design and fluted rubber cover. We help you design the brand to your specifications, then stand behind it with our special repair policy.

- More durable elements
- Extra bracing for longer life
- Economical repair policy
